

Github is a free education!

But 99% of Developers don't know the best repos to learn!

Here are the top 5 repos to learn coding:

Git ignore

Every Git user (basically every developer) needs this repo.

It tells git to ignore tracking some files that are not important to your project!

A collection of `.gitignore` templates

This is GitHub's collection of `.gitignore` file templates. We use this list to populate the `.gitignore` template choosers available in the GitHub.com interface when creating new repositories and files.

For more information about how `.gitignore` files work, and how to use them, the following resources are a great place to start:

- The [Ignoring Files chapter](#) of the [Pro Git](#) book.
- The [Ignoring Files article](#) on the GitHub Help site.
- The [gitignore\(5\)](#) manual page.

Folder structure

We support a collection of templates, organized in this way:

The Algorithms

No matter what programming language you use, this repo has a collection of algorithms implemented in different languages

Free learning resources

If you don't want to spend money
but want to get the best learning
resources for free, this repo is for
you!

List of Free Learning Resources In Many Languages

 awesome  License CC BY 4.0  Hacktoberfest 2022 is over! (1.9k PRs opened)

Search the list at <https://ebookfoundation.github.io/free-programming-books-search/>  Dynamic search site  up .

This page is available as an easy-to-read website. Access it by clicking on  Static site  up .

Intro

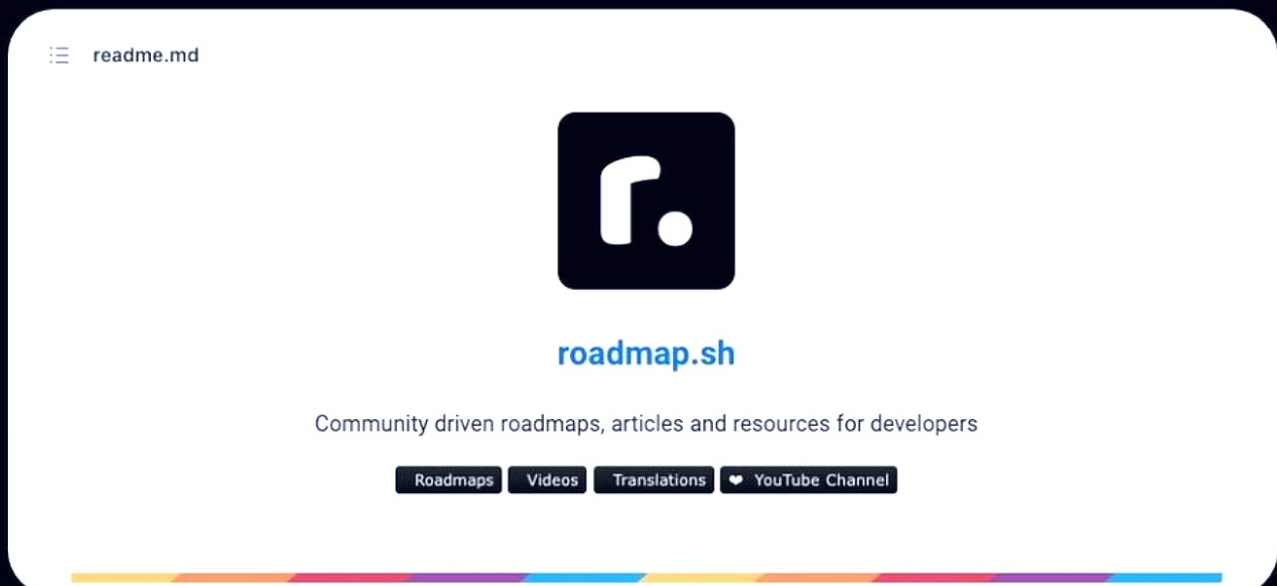

This list was originally a clone of [StackOverflow - List of Freely Available Programming Books](#) with contributions from Karan Bhangui and George Stocker.

The list was moved to GitHub by Victor Felder for collaborative updating and maintenance. It has grown to become one of [GitHub's most popular repository](#).

Developer roadmap

if you want to become a developer
and don't know where to start, this
repo is for you!

Coding interview university

You can't go to an interview without check out this repo first! it has everything you need to ace the interview!

Coding Interview University

I originally created this as a short to-do list of study topics for becoming a software engineer, but it grew to the large list you see today. After going through this study plan, [I got hired as a Software Development Engineer at Amazon!](#) You probably won't have to study as much as I did. Anyway, everything you need is here.

I studied about 8-12 hours a day, for several months. This is my story: [Why I studied full-time for 8 months for a Google interview](#)

Please Note: You won't need to study as much as I did. I wasted a lot of time on things I didn't need to know. More info about that below. I'll help you get there without wasting your precious time.

The items listed here will prepare you well for a technical interview at just about any software company, including the giants: Amazon, Facebook, Google, and Microsoft.

Best of luck to you!
